

At Shearwater Hotel & Spa, we are committed to ensuring digital accessibility for all users, including people with disabilities. We strive to continuously improve the user experience for everyone and apply relevant accessibility standards to achieve this goal.

Our aim is to comply with the Web Content Accessibility Guidelines (WCAG) 2.1 Level AA wherever feasible, and to make ongoing improvements based on user feedback and evolving best practices. We regularly test our website using automated tools and manual checks to ensure content is clear and navigable, providing staff training and accessibility awareness

Accessibility Assessment Approach

We take a blended and well-informed approach to assessing accessibility. Our work is underpinned by engagement with specialist accessibility consultants, alongside participation in relevant training and information initiatives. This is complemented by internal manual reviews and the use of automated testing tools, ensuring a thorough and reliable evaluation of the website's accessibility. Assessments were carried out using a range of methods and tools, including browser-based testing, screen reader testing, manual checks and keyboard-only navigation testing.
